Role & Permission

1. Sign in PHASE 1 READY

2. 1 Sign up PHASE 2 READY

2. 2 Home page & Offers list screen update with creator status PHASE 2 READY

3. View list offers PHASE 1 READY

4. View Offer Details PHASE 1 PHASE 2 READY

5. Taken on offer and Request/skip sample PHASE 2 READY

6. Submit fitting PHASE 2 READY

7. Upload footage PHASE 1 READY

8. View & Update My Profile PHASE 2 READY

9. Testing offer - Take on & Submit footage PHASE 2 READY

VII. Non-Functional Requirements

VIII. Data Migration

IX. Remaining Questions

I. Objective

✓ I. Objective

Provide a unified platform for Creators (individual KOLs or Studios) to register, receive UGC video production offers, perform fitting tests with samples, film footage according to scripts, and submit deliverables to brand owners — replacing the fragmented Chat/Drive/Spreadsheet workflow with a single app (web + mobile).

Success Metrics

- Northstar metric: No.of footages, Footage cost

Efficiency	Efficacy
Reduce time from offer apply to sample receipt	Increase first-time fitting approval rate (reduce rework)
Reduce back-and-forth messaging with brand owner	Increase first-time footage approval rate
Time-to-first-offer for new creator	Creator portfolio completion rate >80%
	Reduce revision rate

II. Business Context

✓ II. Business Context

1. Background

Creators are content producers for brands. They can be:

- **Individual KOL** — solo creator using themselves as talent
- **Studio** — production team with equipment (lighting, mannequins, props) serving multiple brands

2. Current pain points (Creator side)

- Fragmented Footage submission
- Unclear footage script, needs confirm back-and-forth
- Unclear reject reason
- Limited offers
- No dashboard
- Fragmented history of completed jobs

3. Business Goal

- Increase footage number
- Cheap footage cost

III. Problem Statement & Solution

▼ III. Problem Statement & Solution

#	Pain Point	Solution
P1	Manual onboarding per new brand, not up-to-date profolio	Sign-up + Portfolio upload
P2	No offer dashboard Must scroll chat/email; miss new offers due to message overflow	Offers dashboard with filters & search
P5	Unclear footage rejection	Scene-by-scene footage upload & details footage approval/rejection explanation
P6	No history of completed jobs Hard to claim portfolio; hard to track earnings	My profile

IV. Operational Change

▼ IV. Operational Change

Actor	As-is	To-be
New Creator	Send CV via chat to each brand	One-time sign up + portfolio Includes need_review gating for qualified creator
Creator	Apply to offer via fiverr/upwork/email...	Request sample and start working when

Role & Permission

▼ Role & Permission

Creator role only - no sub-role distinction between Individual vs Studio for permissions; only differs in onboarding data fields.

Action	Creator
Sign up	✓
View own profile + portfolio	✓
Edit own profile + portfolio	✓
View own offers	✓
Request sample	✓ if offer status === NEW
Submit fitting	✓ if offer status === SAMPLE_DELIVERED
Upload footage	✓ if offer status === FITTING_APPROVED
Re-upload rejected clips	✓ if offer status === REJECTED

1. Sign in PHASE 1 READY

▼ Sign in

User story: As an existing Creator, I want to sign in to access the app — either with email/password or with a single-sign-on (SSO) provider

Acceptance Criteria:

AC1: Layout

The Sign in screen offers three sign-in options stacked vertically:

1. **"Continue with Google"** (SSO)
2. **"Continue with OTP"** (passwordless sign-in)
3. **Email/password form:** credential inputs

AC2: Field specification (email or username/password form)

Field	Descripti on	Data type	Format	Requir ed?	Validation on field
-------	-----------------	--------------	--------	---------------	------------------------

Email/User name	Email/Username	string	Text input (email type)	Yes	
Password	Password	string	Password input	Yes	Min 8 chars; show/hide eye icon toggle Format password: • Must have at least 8 characters • Must have at least 1 uppercase letter, 1 lower case letter, 1 number, & 1 special character

AC3: Field specification SSO

Field	Description	Format	Logic
-------	-------------	--------	-------

Continue with Google	Google SSO	button	Click → open Google OAuth consent screen (popup or redirect); requested scopes: email, profile (name + avatar)
----------------------	------------	--------	--

AC: Continue with OTP (passwordless sign-in) PHASE 2 READY

- Click "Continue with OTP" → enter account email → "Send code" (validation: email required, else toast "Please enter your email")
- System sends a 6-digit code → enter code → "Verify & sign in" (validation: code must be 6 digits, else toast "Please enter the 6-digit code")
 - On success → user sign in successfully + redirect to Offers/Home page screen
- A "Resend code" button is enabled after 3 minutes (toast "Code resent to {email}")

AC4: Email/password sign in flow

- Click "Sign in" → server-side validation
 - Success: redirect to Offers list (default landing)
 - Wrong credentials: red toast "Incorrect email/username or password"
 - Account is not registered 'Your account is not registered yet'
- ~~Account locked (5 failed attempts in a row): "Account locked. Try again in 15 minutes." (Rate limit can be done later)~~

AC5: SSO sign in flow (existing account)

- Click SSO button → open provider OAuth flow
- Provider returns user identity (email + provider-specific user ID)
- **Match found** (existing account linked to this provider, or existing account with matching email):

- If first time SSO with this provider on an existing account: silently link `{provider, providerId}` to existing user record
- Redirect to Offers list (default landing)

AC6: SSO sign in flow (new account detected)

- If provider returns identity that does NOT match any existing account (no matching providerId AND no matching email) → show error message 'Your account is not registered yet' (sign up will be implemented later)

AC7: SSO error handling

- User cancels OAuth consent → return to Sign in screen, no toast
- Provider returns error (e.g. invalid_scope, network) → red toast "Sign-in with {Google/Apple} failed. Please try again"

AC: Forgot password

Link "Forgot password?" on the sign-in screen opens a 3-screen reset flow:

1. **Reset your password** — enter account email → "Send reset link"
2. **Check your email** — confirmation that a reset link was sent to {email}; link valid for 1 hour
3. **Set a new password** — New password + Confirm password fields (placeholder "Enter password") with a LIVE password-requirement checklist, each rule on its own line, turning green with a check when satisfied:
 - At least 8 characters
 - 1 uppercase letter
 - 1 number
 - 1 special character

On valid → toast "Reset password successfully! Please sign in." → return to Sign in.

AC8: Creator Status-aware redirect (applies to all sign-in methods)

PHASE 2 READY

- Creator qualified → Offers list
- Creator need_review → Home page

- Creator unqualified → Home page

AC8: Apply multi-languages for text, supporting English/Chinese

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs

2. 1 Sign up PHASE 2 READY

✓ 2. Sign up

User story: As a new user, I want to sign up for a new account.

Flow overview: The sign-up wizard has 5 steps in order: (1) Choose type → (2) Basic info → (3) Verify email → (4) Categories → (5) Portfolio.

Step 1 — Choose type

AC1: Access

- User click <Sign up> to open Sign up form
- **SSO entry path:** User clicks "Continue with Google" or "Continue with Apple" and the provider returns an identity that does not match an existing account → system opens the Sign up flow

AC2: Field specification

Field	Description	Data type	Format	Default	Required?	Validation on field
Account type	Account type	enum	Radio card group (2 options)	Individual	Yes	Options: Individual (solo KOL) or Studio (production studio). Click card to select,

- User select Account type to continue to next step

AC3: Back to sign in

- Link "Already have an account? Sign in" at footer → back to Sign in screen

Step 2 — Basic info

User story: As a new Creator, I want to enter basic information to create my account.

AC1: Field specification (Individual)

Field	Description	Data type	Format	Required?	Validation on field
First name	First name	string	Text input	Yes	Max 100 chars
Last name	Last name	string	Text input	Yes	Max 100 chars
Date of birth	Date of birth	date	Date picker	No	Format DD-MM-YYYY
Gender	Gender	enum	Single select dropdown	No	Options: Prefer not to say / Female / Male / Other
Email	Email	string	Text input (email type)	Yes	Max 200 chars Format <code>email</code> → If invalid show error 'Invalid email format'
Country	Country	string	Searchable single-select dropdown	No	Options: ISO country list Default get by IP/GPS
Phone number	Phone number	string	Phone input with country code	Yes	E.164 format
Password	Password	string	Password input	Yes	Placeholder "Enter password"; shows

					LIVE requirement checklist (each rule on its own line, green check when met): • At least 8 characters • 1 uppercase letter • 1 number • 1 special character
Confirm password	Confirm password	string	Password input	Yes	Must match Password

AC2: Field specification (Studio)

Field	Description	Data type	Format	Required?	Validation on field
Studio name	Studio name	string	Text input	Yes	Max 100 chars
Country	Country	string	Searchable single-select dropdown (with phone-code list)	Yes	Options: ISO country list with dialing codes
Email	Business email	string	Text input (email type)	Yes	Max 200 chars Format <code>email</code> → If invalid show error 'Invalid email format'
Phone number	Phone number	string	Phone input with country code	Yes	E.164 format
Password	Password	string	Password input	Yes	Placeholder "Enter password"; shows LIVE

					requirement checklist (each rule on its own line, green check when met): • At least 8 characters • 1 uppercase letter • 1 number • 1 special character
Confirm password	Confirm password	string	Password input	Yes	Must match Password

AC3: Prefill data with SSO

- If user SSO authenticate → Pre fill
 - First name, Last name (for Individual) - can edit
 - Email (for both Individual, Studio). Email will be disabled, cannot edit

AC3: Continue

- "Continue" button always enabled; on click
 - All required field is valid → proceed to the Verify email step
 - Some fields are invalid → Show toastbar 'Please complete the form to continue' + show inline error under each invalid field
 - A password mismatch shows under Confirm password ("Passwords do not match.")
 - Required fields leave blank 'Please complete this required field'
 - Checked email against already-verified emails; if the email is already registered → inline error under the email field: "Email is already registered, please sign in or try another!"
- "← Back" button → back to Step 1 (preserve entered data)

Step 3 - Verify email (OTP)

User story: As a new Creator, I want to verify my email with a one-time code before continuing.

- After Basic info, the system sends a 6-digit verification code to the email entered. The user must enter the code to verify the email before continuing.

- SSO sign-ups (Individual via Google) SKIP this step (email is pre-verified by the provider).
- The system records verified emails; this verified-email set is what duplicate-email detection checks against (see Basic info email validation).

AC1: Field specification

Field	Description	Data type	Format	Required?	Validation on field
Verification code	6-digit email code	string	Text input, placeholder "Enter 6-digit code"	Yes	Numeric, exactly 6 digits

AC2: Buttons

- "Verify"
 - validation:
 - must be 6 digits, else toast "Please enter the 6-digit code";
 - code expires after 15 mins
 - on valid
 - create account
 - Successful: show toast 'Y
 - Failed: show toast 'Failed to create account! Please try again'
 - & navigate users to Categories step
- "Resend code" enabled every 3 minutes after sending code with time countdown,
 - when on click → system resend code & UI show toast "Code resent to {email}")
- "← Back" back to previous step

AC2: Email content

Title [Crossian] Content Creator platform

Body

Please verify your identity

Here is your Crossian authentication code:

%code%

This code is valid for 15 minutes and can only be used once.

Please don't share this code with anyone: we'll never ask for it on the phone or via email.

Thanks,

Crossian Team

You're receiving this email because a verification code was requested for your account. If this wasn't you, please ignore this email.

Step 4 — Categories

User story: As a Creator, I want to select the product categories I create content for.

AC1: Pick one or more product categories, displayed as selectable chips without icons. Options: Bra, Pants, Shirt, T-Shirt, Panties, Accessories, Others. (this list can be configurable or get from PCM in the future)

AC2: At least 1 category is required. "Continue" button always enabled; on click with no selection, show toast "Please select at least one category to continue".

AC3: On valid selection → proceed to the Portfolio step. "← Back" returns to the previous step

Step 5 — Portfolio

User story: As a Creator, I want to upload my portfolio so brand owners can evaluate my quality.

AC1: Field specification for Studio

Field	Description	Data type	Format	Required?	Validation on field
Portfolio images	Portfolio photos	file array	Drag & drop / browse · multi-select	Yes	format: .png, .jpg, .jpeg Allow multiple files Max 10 images Min 1 image

Videos	Sample videos	file array	Drag & drop / browse · multi-select	No	format: .mp4, .mov Allow multiple files Max 5 videos
Social links	TikTok / Instagram / Facebook profile links	object	3 URL inputs (one per platform)	No	Validate input link only Max length: 500
Portfolio file	Media kit / capability deck	file	Drag & drop / browse	No	Formats .pdf, .docx, .pptx Allow multiple files, Max 5 files

AC1: Field specification for Model (KOL)

Same as in Studio, but have 2 more fields

Field	Description	Data type	Format	Required?	Validation on field
Body type	Body type, select from list	string	Single select dropdown list	Yes	Select option from list
Ethnicity look	Ethnicity look, select from list	string	Single select dropdown list	Yes	Select option from list

AC2: Submit

- "Submit application" button always enabled, when user clicks on button, system check

- invalid field → show toast "Please complete your portfolio" + show inline error under invalid fields
- valid → profile user changes to `need_review` → toast "Submit your profile successfully!"

AC3: Skip / submit profile later

- A "Do it later" option creates the account with a pending profile (`profile pending`)
- Toast "Create account successfully! Please submit your profile when ready."
- User lands in Offer screen with card prompt user to add portfolio, follow design

Corner Cases:

- CC1: Show toastbar error message when network error or system error occurs

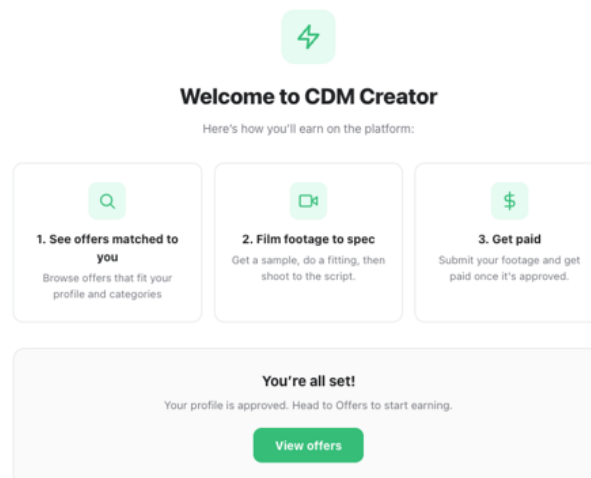

2. 2 Home page & Offers list screen update with creator status PHASE 2 READY

✓ 2. 2 Home page & Offers list screen update with creator status

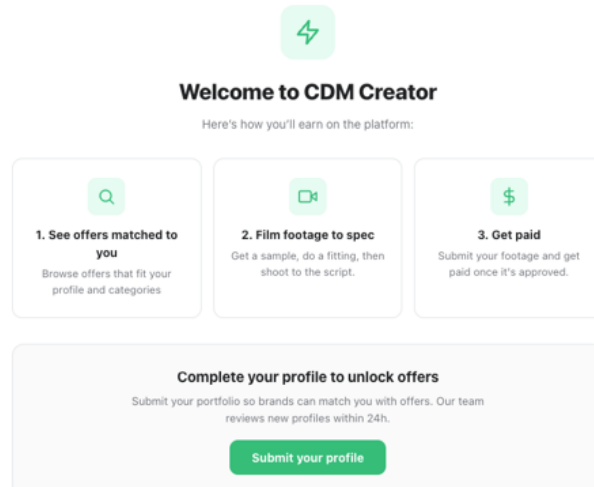

1. **User story:** As a creator I want to view Home page to understand the platform, and have the motivation to submit my profile for review

2. Acceptance criteria

AC1: Profile is qualified, Home page show UI as below, click View offers to navigate to offers

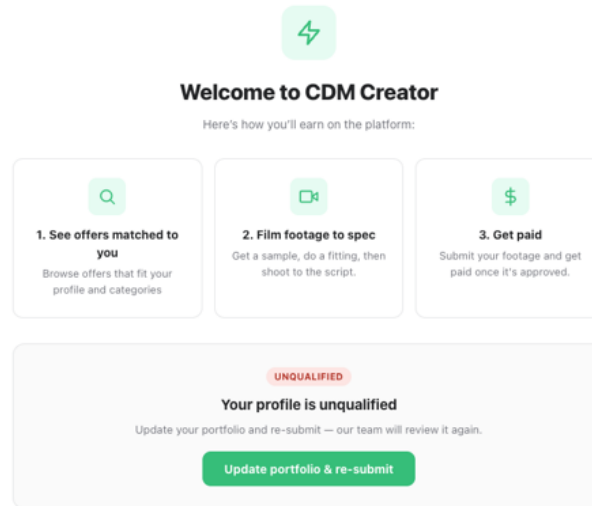

AC2: Profile is not submitted yet, Home page show UI as below with step illustration & card <Not submitted> , click <Submit your profile> to open popup with 2 steps What do you promote & Tell us about your work same as in Signup flow, **also prefill data already saved (trước đó user đã cập nhật data ở màn profile, hoặc điền khi signup thì cần load data đó lên)**

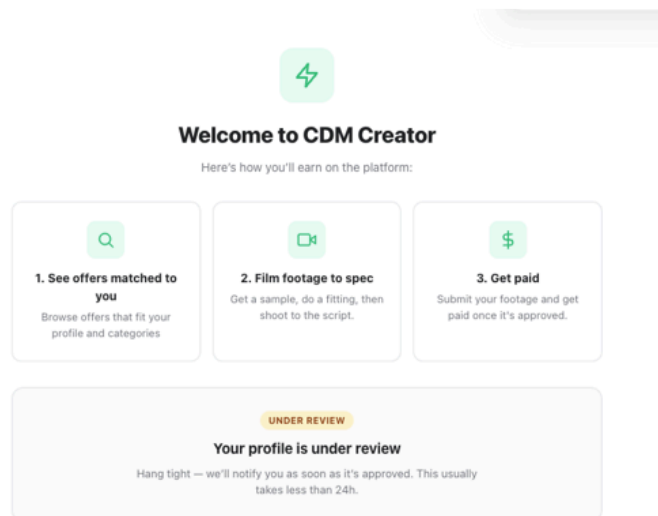

AC3: Profile is unqualified, Home page show UI as below with step illustration & card <Unqualified> click <Update portfolio & resubmit> to open popup with 2 steps What do you promote & Tell us about your work same as in Signup flow, **also prefill data already saved (trước đó user đã cập nhật data ở màn profile, hoặc điền khi signup thì cần load data đó lên)**

When user re-submits, system check diff compared to last submit, if there is no change, show toastbar message 'Your profile is unchanged from last submit. Please update to re-submit' + keep current popup

AC4: Profile is under review, Home page show UI as below with step illustration & card <Under review>

AC5:

- Offers screen show card <Under review>, <Unqualified>, <Not submitted> same as in Home page, according to Creator status. For creator status <qualified> show card <approved>, user can click  to dismiss the card, and don't show again

Offers

Manage your offers and start earning

Search by offer name, product, or ID...

All statuses

All products

Deadline

Fee

-
- Offers screen show empty state or data state based on creator's offers data

AC6: Apply multi-languages for text, supporting English/Chinese

3. Corner case

CC1: Show toastbar error message when network error or system error occurs

3. View list offers PHASE 1 READY

✓ View list offers

1. **User story:** As a Creator, I want to view my offers list with filters to start earning

2. **Acceptance Criteria:**

AC1: Access

- Default landing <Offers> after login to the system
- System show all offers distributed to users, ordered by last updated DESC

AC2: Field specification (Filters&Sorting)

Field	Description	Data type	Format	Validation on field
Search	Search	string	Text input	Search by product name offer name, offer ID
Status	Status	enum	Single select dropdown	Options: status list, Sorted by lifecycle order.

Product	Product	string	Searchable single select dropdown	Options: List of products having at least 1 offer assigned to user
Deadline	Sorting by Deadline	date	sort	
Fee	Sorting by fee	number	sort	

AC3: Offer data specification

Field	Description	Logic
Thumbnail	Product Thumbnail of offer	
Product name	Product name	
Product line	Product line	
Offer ID	Offer ID	
Status	Offer Status	
Fee	Offer's Total fee	Currency format Default • KOL: USD • Studio: CNY (we can update by user settings in later phase)
Deadline	Deadline	Format DD-MM-YYYY Show 'Due in xD' with x <=10 days for offer

Sample & Payment details	• Show from status Sample_requested onward ◦ collapsible, default = collapsed ◦ Shipping address: display shipping address data ◦ Payment method: display payment method Paypal/Bank with corresponding data ◦ Show requested date ◦ Size details: display size details data
Fitting & Confirm Delivery	1. Don't have fitting history a. If offer status = <sample_requested> & <sample-shipped> → show Fitting - waiting & disabled b. If offer status = <sample_shipped> show <Has your sample arrived> section, user can click button <Confirm delivery> to mark offer as <sample_delivered> c. If offer status = <sample_delivered> show upload area. Refer PRD - CD M Creator 6. Submit fitting phase 2 draft d. If offer status = <fitting_submitted> show uploaded media in fitting e. If offer status = <fitting_rejected> show uploaded media with reject status f. If offer status = <fitting_approved> show uploaded media with rejected status 2. Have fitting history a. Show button History, user clicks to expand historial fitting attempt

Job footage **PHASE 2**

1. If offer status = <New>,
<sample_requested>,
<fitting_submitted> <fitting_rejected>:
display all scene but in locked state
'Locked - Fitting must be approved
first' **PHASE 2**
2. If offer status = <fitting_approved>:
Display all scenes with upload area
PHASE 2
 - scene number, title, action description
 - upload area
2. If offer status = <Submitted>: display all
scenes with uploaded footages
3. If offer status = <Approved>: display all
scenes with footages having status =
approved
4. If offer status = <Rejected>: display all
scenes with footages
 - a. approved footages having indicator
<Approved>
 - b. rejected footages having indicator
<Rejected> + all comments

AC2: Apply multi-languages for text, supporting English/Chinese

3. Corner case

CC1: Show toastbar error message when network error or system error
occurs

5. Taken on offer and Request/skip sample **PHASE 2** **READY**

✓ 5. Taken on offer and Request/skip sample

1. **User story:** As a Creator, I want to taken on a NEW offer then request sample with size
details, shipping address, or skip sample then provide payment method
2. **Acceptance Criteria:**

AC1: Trigger

- Offer status === **NEW** → show section <New offer>
 - Up to %total fee%
 - Steps info follow design
 - "Take on" button enabled → clicks on to open popup **Step 1 - Sample & Shipping**

AC2: Sample

- Display **Previous sample** section
 - Show previous samples creator received for that product with variant name & size
 - When there's no sample → show 'No sample received. You need to request sample'
- **Options**
 - **Request new sample:** always enabled
 - When select **Request new sample:** show size details + shipping address
 - **Skip sample:** disabled if there's no previous sample → then auto select **request new sample**
 - When select **<Skip sample>**: Hide size details + shipping address

AC2: Size details

- Structured size form per product line. Refer [Size details](#) , data type Decimal(6,2), >0
- **For Studio**
 - Can select Model or Mannequin
 - Select Model:
 - User can select model from list
 - Each model has Name & corresponding size measurements
 - Saved model is shown in read mode, user can click button <Edit> to Edit size measurements and Save
 - User can create new model
 - User needs to fill in Name & size measurements. All fields are required and validated per UI/UX convention.
 - Select Mannequin:
 - User can select mannequin from list
 - Each mannequin has Name & corresponding size measurements
 - Saved mannequin is shown in read mode, user can click button <Edit> to Edit size measurements and Save

- User can create new model mannequin
 - User needs to fill in Name & size measurements. All fields are required and validated per UI/UX convention.
- **For Model:** the creator's saved measurements pre-fill, creator can edit to update their size measurement
- ~~Editable until preparing (optional): while the offer is SAMPLE_REQUESTED (brand has not started preparing), the Creator may edit the submitted size details. Once the brand marks the sample as SAMPLE_PREPARING (or later), size details are locked (read only).~~

AC2: Shipping address

- Default select the 'default' shipping address
- Button Change is shown when there is at least 2 shipping address available. User can click <Change> to open Available Shipping address popup to select another one
- Button "+ Add new" is always shown, user can click button to open form to add new shipping address
- If there is no shipping address → show empty state 'No available shipping address. Please add new'

Add-new shipping address

Field	Description	Data type	Format	Required?	Validation on field
Label	Label	string	Text input	No	Max 100 chars
Recipient name	Recipient name	string	Text input	Yes	Max 100 chars
Country	Country	enum	Searchable Single-select dropdown	Yes	Options: List of countries
City	City	enum	Searchable Single-select dropdown	Yes	Options: List of cities of selected country
Phone	Phone	string	Phone input with country	Yes	E.164 format

			code	Prefill account's phone number	
Street	Street, house number	string	Text input	Yes	Max 200 chars
Ward	Ward	string	Text input	No	Max 200 chars
District	District	string	Text input	No	Max 200 chars

- User clicks **<Continue>** to go to next step <Payment information?>
 - on invalid: toastbar summary 'Please complete the form'+ inline errors under each field;
 - on valid: navigate to next step <Payment>

AC3: Payment information

- Default select the 'default' payment infor
- Button Change is shown when there is at least 2 payment info available. User can click <Change> to open Available Payment infor popup to select another one
- Button "+ Add new" is always shown, user can click button to open form to add new payment info
- If there is no payment method, show empty state "No available payment method. Please add new"

Add-new payment info

- Payment type: Paypal/Bank
- If payment type = Paypal, the following fields are as blow

Field	Description	Data type	Format	Required?	Validation on field
Full name	Account number	string	Text input	Yes	Max length: 200
PayPal email/phone number	PayPal email/phone number	string	Text input	Yes	Auto detect phone number based on number input

					else, display as email
Button Save					Enable, when clicks → validate all fields - Invalid → Show toast 'Please complete the form' + show inline error under each invalid field - Valid → Save the new payment info - Successful: Show toast 'Add new shipping address successfully! + auto select this shipping address - Failed: Show toast 'Failed to add new shipping address' + stay in current screen

- If payment type = Bank, the following fields are as blow (có thể nghiên cứu live verification sau, hiện tại tạm lưu thông tin như ng dùng nhập)

Field	Description	Data type	Format	Required ?	Validation on field
Bank information	Bank name	enum	Text input	Yes	Max length: 500
Beneficiary name	Beneficiary name	string	Text input	Yes	Max length: 200
Account number	Account number	string	Text input	Yes	Max length: 34 (IBAN global maximum) • Min length: 4 • Automatically strip all whitespaces on paste.
SWIFT code / BIC	Bank Identifier Code	string	Text input	No	Fixed length: 8 or 11 characters

Routing number	Routing number (ABA/BSB/Transit)	string	Text input	No	Max length: 15 (To cover all global routing formats)
Button Save					Enable, when clicks → validate all fields - Invalid → Show toast 'Please complete the form' + show inline error under each field - Valid → Save the new payment info - Successful: Show toast 'Add new payment method successfully! + auto select this payment info - Failed: Show toast 'Failed to add new payment method' + stay in current screen

AC5: Action button

Submit request: always enabled; on click validate

- on invalid: toastbar summary 'Please complete the form' + inline errors under each field;
- on valid:
 - Successful: show toast "Request sample successfully! Brand will ship sample soon!" + offer status NEW → SAMPLE_REQUESTED + Redirect back to Offer Detail with updated

status

- Failed, show toast "Failed to request sample! Please try again" + stay in current page

Cancel

- "Cancel" button → close form without saving

AC: Apply multi-languages for text, supporting English/Chinese

3. Corner Cases:

- CC1: Show toastbar error message when network error or system error occurs
-

6. Submit fitting PHASE 2 READY

✓ Submit fitting

1. **User story:** As a Creator, I want to confirm sample delivery and send photos/videos of me trying the sample for the brand to verify before filming.

2. Acceptance Criteria:

AC1: Confirm delivery

- When offer status === `SAMPLE_SHIPPED`, the creator sees a "Confirm delivery" action
- Click "Confirm delivery" → status `SAMPLE_SHIPPED` → `SAMPLE_DELIVERED`; toast "Sample delivered successfully! You can now start the fitting."
- Fitting upload area becomes available only AFTER status is `SAMPLE_DELIVERED` (not while `SAMPLE_SHIPPED`)

AC2: Field specification

Field	Description	Data type	Format	Required ?	Validation on field
Media files	Fitting photos and videos	file array	File input · drag & drop / browse	Yes	• Image: ◦ .png, .jpg, .jpeg ◦ Max 20MB per file • Video: ◦ .mov, .mp4 ◦ Max 5G per file

					• Min: 1 file • Total Max 50 files (both image & video)
Note	Note to brand	string	Textarea	No	Free text Max 1000 chars

AC3: Submit

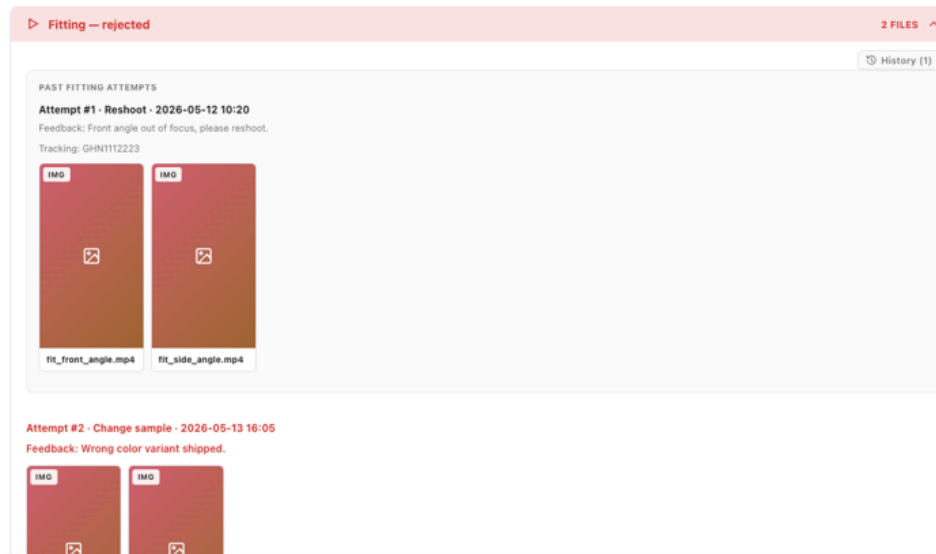

- "Submit fitting" button always enabled; on click,
 - if no file uploaded show toast "Please upload at least 1 file";
 - on valid:
 - Submit successful:
 - status SAMPLE_DELIVERED → FITTING_SUBMITTED
 - Show Toast "Submit fitting successfully! Awaiting brand approval + stay in current page"
 - Submit failed
 - Show Toast 'Failed to submit fitting! Please try again' + stay in current page

AC4: Post-submit

- Status banner top: "Fitting submitted - awaiting brand approval"
- Display media uploaded

AC5: Fitting rejected & re-submit flow

- When the reviewer rejects the fitting (both reshoot & change sample> → status changes to 'FITTING_REJECTED'
- When the reviewer input new tracking number → status changes to 'SAMPLE_SHIPPED'
 - Creator can confirm delivery then re-upload fitting from the fitting card again
 - If there are >= 2 fitting attempts, Previous fitting attempts will be stored in History, user can clicks to History to expand all previous fitting attempt data, each fitting attempt will show reason (Reshoot/Change sample) Date reject, Feedback, Submitted date

3. Corner Cases:

- CC1: Show toastbar error message when network error or system error occurs

7. Upload footage PHASE 1 READY

7. Upload footage

1. **User story:** As a Creator, I want to upload footage scene-by-scene per the script requirements.

2. Acceptance Criteria:

AC1: User can drag & drop file, or upload from device

- Each scene can have 1 or multiple footages uploaded
- Allow format video: .mp4, .mov
- Max 400 files, Max size 5G per file

AC2: Submit footage

- User clicks button "Submit for review"
 - If there is at least 1 scene missing footage → show toastbar message 'Missing footage in scene %x%, please complete all to submit' display all missing scene in %x%
 - If valid → system submits footage
 - Successful: show Toast "Footage submitted successfully!" + Offer changes to <Submitted>

- Failed: Show toast “Fail to submit footage. Please try again!”

AC3: Re-upload when status === REJECTED

- Only rejected footage having button <Replace> to upload new footage
- User click button <Replace> to upload new footage & replace the current rejected one
- User clicks <Submit re-uploaded clips> button
 - If there is at least 1 scene still having rejected footage → show toastbar message ‘Missing new footage in scene %x%, please complete all to submit’ display all missing scene in %x%
 - If valid → system submits footage
 - Successful: show Toast "Footage submitted successfully!" + Offer changes to <Submitted>
 - Failed: Show toast “Fail to submit footage. Please try again!”

AC4 Apply multi-languages for text, supporting English/Chinese

3. Corner case

CC1: Show toastbar error message when network error or system error occurs

8. View & Update My Profile PHASE 2 READY

▼ 8. View & Update MyProfile

1.User story: As a Creator, I want to view and update my personal profile + portfolio + payment + shipping details.

2.Acceptance Criteria:

AC1: Tabs

- 4 tabs: Profile / Portfolio / Payment / Shipping addresses
- Default tab: Profile

AC2: Profile tab

- Default read-only mode
- There are 2 sections
 - **Basic information**

- Fields include:
 - First name
 - Last name
 - Date of birth
 - Gender
 - Country
- User can click <Edit profile> to edit all fields
 - Validation same as in Sign up flow
 - User click Save changes:

AC: Apply multi-languages for text, supporting English/Chinese

3.Corner Cases:

- CC1: Show toastbar error message when network error or system error occurs
-

9. Testing offer - Take on & Submit footage PHASE 2 READY

✓ 9. Testing offer - Take on & Submit footage

User story: As a qualified Creator, I want to take on a testing offer and upload footage, so I can pass the test and become an Official creator.

AC1: Testing offer characteristics

- A testing offer is a special offer with **no sample and no fitting** steps (those sections are hidden in the offer detail and timeline).
- Testing offer is show in Offers section

AC2: Take on flow

- Offer status === **NEW**
 - → “Testing offer” section with “Up to %max fee%” and steps:
 - Step 1 Confirm payment
 - Step 2 Sign contract (for later phase)
 - Step 3 Film and upload.
 - Primary action “Take on”.
- Click “Take on” → show popups:
 - **Popup 1 — Payment details:** if a saved payment method exists, show it as a card with “Change” / “+ Add new”; if none, open the “Add new” form directly. Same payment fields as the standard offer flow.
 - **Popup 2 — Sign contract:** contract summary + a checkbox “I have read and agree to the contract above.” + “Sign & take on”.
(skip for this phase)
- On completion → status **NEW** → **TAKEN** ; toast “Contract signed. You can now upload your footage.”

AC3: Job footage

- Before signing (status **NEW**): scenes shown locked with “Locked — Sign contract to unlock”.
- After **TAKEN**: footage upload unlocked; Creator uploads scene-by-scene and submits for review
- Sample & payment details
 - Show note “No sample”.
 - Show payment info

AC4: Outcome

- When the Reviewer approves the testing footage, the creator is promoted to **Official**. & [PRD - CDM portal for reviewers | 20. Approve testing footage → promote creator to Official Phase 2 draft](#)

- When the Reviewer reject the testing footage, the creator is still in status <Qualified>, they can still upload footage for review later
- Creator state follows [CDM hub - Content Development Management | Creator State diagram](#)

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs.

VII. Non-Functional Requirements

Criteria	Expected	Actual	Note
Performance	Page load <2s; image thumbnail load <1s	TBD	CDN + lazy load below fold
Mobile responsiveness	Support iOS 15+, Android 11+, viewport 360-768px	TBD	Mobile-first design
File upload	• Max 400 video/script • 3G/video	TBD	Resume support
Offline mode	View offers list cached; submit actions require online	TBD	Service worker
Security	HTTPS only; PII encrypted; session tokens HttpOnly cookies	TBD	OAuth2 / JWT
Reliability	Uptime 99.9%		
Scalability	adapt to growing KOL, studio,		

	growing footage scripts & deliverables CCU: ??		
Accessibility	Screen reader compatible	TBD	

VIII. Data Migration

IX. Remaining Questions

Question	Owner	Status
Phone verification (OTP)?	Product	Likely v2
Mobile app: native iOS/Android or PWA only?	Engineering	v2
