- 19. Approve testing footage, promote creator to Official PHASE 2 READY
- 20. Creator Testing section READY

I. Objective

Objective

Provide a platform for Brand owners / Content Owners (collectively the **Reviewer**) to manage the end-to-end UGC footage production process: review structured scripts gen by AI, publish scripts, vet the creator pool, ship samples, review fittings, review footage scene-by-scene, and approve payouts.

Success Metrics

Efficiency	Efficacy
Reduce time to create 1 script template	Increase first-time fitting approval rate (reduce round-trips)
Reduce time to review 1 fitting submission	Reduce revision rate
Reduce time to review 1 footage submission	Increase creator pool quality bar (qualified rate >70%)

II. Business Context

Business Context

1. Background

The Reviewer is responsible for creating briefs, tracking production, and approving deliverables for the brand. They work with multiple creators in parallel, multiple product lines, and multiple campaigns.

Reviewer roles in Crossian:

- **Content Owner:** creates scripts, approves fittings + footage, manages creator pool, approves new creators

2. Current pain points (Reviewer side)

- **Fragmented & time-consuming script creation:** copy-paste from old Google Sheet then update, no structured template

- **Fitting check via chat/file**
- **Footage review in Drive, takes too much time**
- **Manual creator pool management:** vetting via DM, no queue
- **No central dashboard:** must manually aggregate to report up to management

III. Problem Statement & Solution

▼ Problem Statement & Solution

#	Pain Point	Feature solution
P1	Scripts rewritten from scratch each campaign ~4h/script; inconsistent format across CO	Script auto gen by AI
P2	Fitting check via google sheet/social chat/other platform No centralized history log	Fitting check in Creator app
P3	Reviewing full videos for footage take time	Gate 1: AI check with clear explanation & suggested decision Gate 2: Reviewer approve/reject
P4	Creator portfolio collect & approve via DM, email Vetting not systematic; portfolio is not up-to-date	Review & Approve qualified lead in CDM portal

IV. Operational Change

▼ Click here to expand...

Actor	As-is	To-be	Notes
Reviewer	Write script in Sheet/ppt	Create structured script in Crossian, reuse templates	Variants & product infor picked from existing database
Reviewer	Send brief PDF/Doc via Slack	Publish script → auto-creates offers for qualified creators	Auto-match by persona
Reviewer	Confirm sample shipment via chat	Click "Ship sample" with tracking ID in app	Audit log
Reviewer	Reply on sheet with fitting feedback	Approve/Reject fitting with required feedback in app	
Reviewer	Review footage in google drive/chat	Review each clip in app, approve/reject independently	Per-clip rejection scope
Reviewer	Review & update creator in google sheet	Creator Profile in app to approve/reject	Confirm modal before action

V. Functional Requirements

AC3: Pagination

- Follow design system

3. Corner Case

CC1: Show Empty state page when no data found

CC2: Show toastbar error message when network error or system error occurs

4. Review & Edit Footage Structured Script PHASE 1 READY

4. Review & Edit Footage Structured Script

1. **User story:** As a Reviewer, I want to review & edit a script with a clear structure to brief creators effectively.

2. **Acceptance Criteria:**

AC1: Access

- Click <Review> a Script → open Script Details

AC2: Structured script

- **Deadline:** Date time picker. Default = T+30 days, in which T is script created date
- **Type:** Studio/KOL. User can update if script is created manually by user
- **3 Section Cards (collapsible)**

Section	Title	Default expanded
① Product Description	Product description + variants + USP	Yes
② Important — Read Me First	Important rules for good filming	No
③ Scene Requirements	Detailed per-scene requirements	Yes

AC3: ① Product Description - field specification

Field	Description	Data type	Format	Required?	Validation on field
Description	Product description	string	WYSIWYG	Yes	Max 5000 chars
Variants	Selected variants	object array	Product Color Variant Selector	No	Single-select dropdown trigger + horizontal chip list. Each chip: swatch circle + name + × remove Options: Get color variants

					from current product
USP features	Unique selling points	string array	WYSIWYG	No	Max 10 items; each item max 1000 chars; " + Add USP button at end of list

AC4: ② Important section

Each rule = 1 Rule Row component with 2-col grid layout

User can add more rule

Field	Description	Data type	Format	Required?	Validation on field
Label	Rule label	string	WYSIWYG text only	Yes	Max 200 chars; placeholder "Rule label (e.g. Lighting setup)"
Description	Rule description	string	WYSIWYG text only	Yes	Max 500 chars; placeholder "Rule description..."
References	Reference materials	object array	Refs panel	No	references in 3 types: image /

					video / url. User can add more Maximum 5 reference in total Disable button + if reaches 5 refs
--	--	--	--	--	---

Reference types — field specification

Type	Field	Data type	Format	Required?	Validation on field
Image ref	Image	Image	.png, .jpeg, .jpg	No	Max 20MB for each
Video ref	Video	number	.mp4, .mov	No	Max 1GB for each
URL ref	URL	string	Text input	Yes	Format http:/ / or https:/ / ; max 500 chars;
	Description	string	Text input	No	Max 500 chars;

AC5: ③ Scene Requirements — per scene field specification

- Each scene = 1 card with 2-col layout
- "+ Add scene" button at the end of scenes list → Click to add more scene
- Each scene card has remove button → Click to remove

Field	Description	Data type	Format	Required?	Validation on field
Scene number	Order number	integer	Auto-gen	Yes	Auto increment
Title	Scene title	string	WYSIWYG text only	Yes	Max 500 chars
Action	Main action	string	WYSIWYG text only	Yes	Max 500 chars
Background	Background setting	string	WYSIWYG text only	No	Max 500 chars
Detail requirement	Detailed requirement	string	WYSIWYG text only	No	Max 1000 chars
Variants for scene	Applicable variants	object array	Multi-select chips	No	Display all product color variants to select
Fee	Scene fee	number	DECIMAL (28, 4)	Yes	Min 0; currency format User can select currency

					Default • Studio: Yên • KOL: USD
References	References	object array	Refs panel	No	Same structure as Rule Row refs (image/video/url)

AC6: Header actions

- "Publish" button: enables when all required fields in script & persona are filled. Refer

AC7: Auto-save, Undo, Redo

- Auto-save on change
- Status indicator top: "Saving..." → "Saved Xs ago"
- User can undo, redo

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs

5. Review & Update Footage Script - Persona tab PHASE 1 READY

▼ Review & Update Footage Script - Persona tab

1. **User story:** As a Reviewer, I want to view/update persona requirements so the system/human can match suitable creators.

2. **Acceptance Criteria:**

AC1: Field specification

- Editable when script status == Draft
- Non-editable when script status == Published

Field	Description	Data type	Format	Required?	Validation on field
-------	-------------	-----------	--------	-----------	---------------------

Age range	Age range	enum	Single select dropdown	Yes	Options: 18-24 / 25-34 / 35-44 / 45- 54/55+
Gender	Gender	enum	Single select dropdown	Yes	Options: Female / Male / Others/ Any
Body type	Body type	enum	Single select dropdown	Yes	Options:
Ethnicity look	Ethnic appearance	enum	Single select dropdown	Yes	Options: East Asian / Southeast Asian / South Asian / Middle Eastern / European / African / Mixed / Any
Location	Geographic location Select Country then Select city	string	Searchable dropdown	No	

Rate range	Price range	String	Text input	No	Max length 200 chars
------------	-------------	--------	------------	----	-------------------------

3. Corner case

CC1: Show toastbar error message when network error or system error occurs

6. Create new footage script PHASE 1 READY

6. Create new footage script

User story: As a Reviewer, I want to create a new footage script directly from a product row

Acceptance Criteria:

AC1: Entry point

- Primary entry: **"Create footage script"** button in the Action column of every row on the **Products tab** (see section 1 AC4)
- Visible only on Product having status = **Active & Publish**
- Click → system creates the script immediately and navigates to Script Detail screen

AC2: System behavior — create draft script

1. **Generates a new script ID:** SC + incremental number
2. **Get product information**
 - **description** : empty in MVP (needs check what data to get)
 - **variants** : get all color variants
 - ~~USP features: (remove in MVP)~~
3. **Important - Read me first**
 - Load default data if any based on product line & script type. For example
 - Bra - KOL
 - Bra - Studio
 - Pants - KOL
 - Pants - Studio

4. **Creates 1 empty scene:** `{id: "S01", num: 1, title: "", action: "", background: "", detailRequirement: "", fee: 0, currency: "USD", variant: [], refs: []}`

5. **Sets script header:**

- `productId`, `productName`, `product line` is displayed
- `title` = "" can fill in
- `status` = "draft"
- `AI gen` = "false" (this script is not AI-generated)
- `createdBy` = `CURRENT_REVIEWER.id`
- `createdAt`, `updatedAt` = `now()`
- `deadline` = today + 30 days

3. Corner case

CC1: Show toastbar error message when network error or system error occurs

CC2: When create script failed, show toastbar message 'Failed to create script'

7. Publish + Distribute footage script PHASE 1 READY

▼ 7. Publish + Distribute footage script

1. **User story:** As a Reviewer, I want to publish a finalized script and distribute it to qualified creators so that they can start producing footage.

2. **Acceptance Criteria:**

AC1: Publish button

- Visible only on DRAFT scripts in Product having status = Active & Publish

AC2: When click on <Publish >button

- If All of the following are met → open Publish Modal
 - Script deadline $\geq$ current time + 5 days
 - Script has at least 1 scene with a non-empty title
 - All required Product fields are filled (description + ≥ 1 USP)
 - Important - Read me first section has ≥ 1 rule

- Persona section has required data
- If any of the above requirements is not met
 - Show toastbar message 'Please complete the script before publishing' + Show error message under each failed data field
 - Script deadline $\geq$ current time + 5 days → if not, error message under field "Script deadline must be at least 5 days from today to give creators enough time to produce footage."
 - Script has at least 1 scene with a non-empty title
 - All required Product fields are filled (description + ≥ 1 USP) → if not, error message under field "Please complete description and USP."
 - Important - Read me first section has ≥ 1 rule → if not, error message 'Must have at least 1 rule'
 - Persona section has required data → if not, error message under each data file 'Please complete this required field'

AC2: Publish Modal — main view

Field	Description	Data type	Format	Logic
Header	Title + script name	text	" Publish script" + script name	Read-only
Close button	Close modal	button	× icon top right	Click → dismiss without saving
Creator assignment	Mode toggle	enum	Segmented control: "Auto assign" "Manual assign"	Default: "Manual" Temporarily disable Auto when feature is not available yet

Mode description	Inline hint	text	Below the toggle	"Auto: system picks 2–3 creators based on category + history." / "Manual: pick creators from talent pool directly."
Select creators (manual only)	Talent multi-select	array	Searchable multi-select with chips	At least 1 creator must be selected to proceed Options: List all qualified creators according to script type (KOL or studio)
Continue button	Proceed to confirm	button	Primary green "Continue →"	Disabled if mode === "manual" && selectedcreator === 0 • tooltip: "Select at least 1 creator to continue"

PublishModal — Manual assign mode UI

- "Selected chips" row above the search input — each chip = green pill with avatar + name + ✕ remove
- Search input: Search by name or email; placeholder "Search creators by name or email..."
- Each row in dropdown: avatar + name + role badge (KOL / Studio)
- "X selected" counter inline with section heading

AC3: Publish Modal — Confirm view (after Continue)

Field	Description
Heading	"Confirm publish"
Subhead	"Script will be locked for editing once published."
Summary card	Key-value list: Script title Product Scenes (count + total fee) Assignment (mode summary or talent names CSV)
Back button	Outline gray, returns to main modal view
Confirm button	Primary green "✓ Confirm & Publish" — fires the publish action

AC4: Publish action — system behavior

When Reviewer confirms:

1. Script transitions: `status = "draft"` → `status = "published"`; `assignees` field populated with selected creators
2. For each picked talent, a synthetic **Offer** (Job) is created with:
 - `id` = `J` + auto-generated number
 - `title`, `product`, `product line` from script
 - `scriptId` = source script ID (enables structured script lookup on creator-side)
 - `Fee` = sum of all scene fees

- `status = NEW` (creator immediately sees a ready-to-shoot offer in demo mode; in production this should be `NEW` and follow the full sample flow)
- `deadline`
- `script details`
- `creator`

3. The new Offer is **pushed to the top of the creator's "Offers" list**

4. Toast confirmation appears: "Published! Auto-assigned to X creators: {names}" / "Published! Assigned to: {creator names}"

5. Navigation: Reviewer is redirected back to Footage - Scripts tab

AC5: Post-publish — Script is locked

- After publish, ScriptDetail enters **read-only mode**
- "Publish" button is hidden
- A status pill "Published" appears in the header

AC6: Distribution side-effect on creator

- Once a script is published + distributed, each picked Creator sees the new offer at their offer list
- The Offer detail page renders a **read-only structured script** (Product / Important / Scene Requirements)

3. Corner cases

CC1: Show toastbar error message when network error or system error occurs

8. Review uploaded footage scene-by-scene PHASE 1 READY

✓ 8. Review uploaded footage scene-by-scene

User story: As a Reviewer, I want to review each video independently to approve or reject with feedback

Acceptance Criteria:

AC1: Auto pickup

- Reviewer opens ReviewDetail with status === SUBMITTED for the first time → auto-transition SUBMITTED → UNDER_REVIEW (In

review)

AC2: Per-scene Footage Review Card

- Each scene = 1 card with:
 - Header: scene number badge + title + action description
 - Body: Submitted Videos
 - Action button in each footage
 - Approve: mark footage as approved
 - Reject: mark footage as rejected

AC4: Clicking ✓ Approve on a footage:

- If the footage has ≥ 1 unresolved comment, all are bulk-resolved → footage is marked approved
- No `confirm()` dialog. The action is reversible: the reviewer can click Reopen on any comment to re-flag the footage, or click Reject to start over.

AC5: Reject action

Clicking × Reject on a footage:

1. Opens Video Review Modal follows design

- The **left pane** is the video player
- The **right pane** is the comments column.

If the footage has no comments yet, the modal opens with a draft comment ready to type at the start of the clip (0:00)

What the Reviewer can do

1. **Play and scrub the video** — play / pause button, click anywhere on the timeline to jump to that moment
2. **Add a comment at any moment:**
 - Click the timeline at the exact spot they want to comment on
 - A draft card opens with a WYSIWYG editor (text & images)
 - Click **Post comment** to save it; the comment becomes a pin on the timeline and a row in the comments column
3. **Edit, delete, or resolve their own comments** Editing replaces the text with the editor inline. Resolving greys the comment out, resolved comments can be reopened anytime

4. **Cancel** at any time, closes the modal without committing the rejection

AC5: Final decision

- All clips approved → button label "Comfirm Review & Save" → status UNDER_REVIEW changes to APPROVED
- ≥1 clip rejected → button label "Save record (Rejected)"
 - Click → status UNDER_REVIEW changes to REJECTED

AC6: View offer with status <rejected>/approved

- Show footage script read-only, collapsible, default = expand
- Show footage with status approved/reject & feedback (if any)

3. **Corner cases**

CC1: Show toastbar error message when network error or system error occurs

CC2: Faild to save → show toastbar message 'Failed to save review.Please try again'

9. Sample preparing & Sample Shipping PHASE 2 READY

✓ 9. Sample preparing & Sample Shipping

User story: As a Reviewer, I want to mark a sample as being prepared and then ship it with full package details, so the Creator has accurate sample, size and shipping-fee information.

AC1: Sample preparing

- Offer Detail with status === SAMPLE_REQUESTED shows a **“Mark as preparing”** action.
- Click → status SAMPLE_REQUESTED → SAMPLE_PREPARING ; toast “Sample marked as preparing. Add the tracking number once shipped.”
- **“Add tracking number”** is only enabled once status === SAMPLE_PREPARING (and on FITTING_REJECTED with reject

type = Change sample).

- Order in the Sample stepper: **SAMPLE_REQUESTED** → **SAMPLE_PREPARING** → **SAMPLE_SHIPPED**.

AC2: Add tracking number modal - field specification (updated)

Field order in modal: Sample variant (+ sizes) → Total items → Tracking number → Shipping fee → Note.

Field	Description	Data type	Format	Required?	Validation on field
Sample variant	Which variant(s) are shipped	object array	Selectable variant rows (multi-select)	Yes	At least 1 variant. Options = product variants of the offer
Size (per selected variant)	Sizes shipped for each selected variant	string array (chips)	Type a size + Enter / comma → chip; ✕ to remove	Yes	Each selected variant must have ≥ 1 size chip
Total items	Auto-computed count	integer	Read-only	—	= sum of size chips across all selected variants
Tracking number	Carrier tracking number	string	Text input; placeholder “e.g. GHN9023841726”	Yes	Max 100 chars
Shipping fee	Shipping fee	number	Number input with	Yes	>= 0.

			unit currency		• Can be Auto-filled from carrier when fee is retrievable from the tracking number (later phase) • editable
Note	Note to the Creator	string	Text area	No	Free text

AC3: Save

- “Save” always enabled; on click → server validates all fields.
 - Invalid → toast “Please complete the form” + inline errors
 - Valid: save sample data (variants, sizes, tracking, shipping fee, note), status → `SAMPLE_SHIPPED` + toast “Ship sample successfully! Creator notified.”

AC4: Sample & payment details display

- Each shipped variant is shown with its size chips
- “Size details” block directly under Sample variant
- Shipping fee is shown alongside the tracking number; Note shown below.

AC5: Display button Edit next to tracking number when status = `<Sample_shipped>` only, User click to open popup Update tracking number

- Validation same as in Add tracking number
- Click cancel to cancel update
- Click Save to update
 - Check diff when user click Save, if no changes show toast 'No changes detected, please check and update if needed'
 - If valid → Save changes
 - Successful: show toast 'Update tracking number successfully!' + close popup
 - Failed: show toast: 'Failed to update tracking number. Please try again' + keep popup

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs.

10. Review fitting PHASE 2 READY

✓ 10. Review fitting

User story: As a Reviewer, I want to review the fitting and approve or request reshoot/change sample with clear feedback.

Acceptance Criteria:

AC1: Trigger

- ReviewDetail screen, status === FITTING_SUBMITTED → FittingReviewBlock with Approve/Change sample/Reshoot buttons
- Status === FITTING_APPROVED/FITTING_REJECTED → block in read-only mode

AC2: View fitting media

- Mixed media grid (images + videos) with IMG/VIDEO badges
- Creator's note displayed below the grid
- Click thumbnail → open full-screen lightbox

AC3: Field specification (feedback form)

Field	Description	Data type	Format	Required?	Validation on field

Feedback for the creator	Feedback for the creator	string	Rich text area Can add text, image	Optional	Max 1000 chars
--------------------------	--------------------------	--------	---	----------	----------------

AC4: Approve flow

- Click "Approve" → confirm dialog title "Are you sure you want to approve this fitting?"
- Body: "Approve these fitting videos so the creator can proceed with the full footage. The status will move to Fitting approved."
- Confirm
 - status FITTING_SUBMITTED → FITTING_APPROVED
 - Toast "Approve fitting successfully! Creator can now upload footage."

AC5: ReShoot flow

- Click "Reshoot" → confirm dialog title "Request a reshoot?"
- Body: "The creator will re-submit the fitting using the same sample."
- Confirm
 - status FITTING_SUBMITTED → FITTING_REJECTED
 - Toast "Request reshoot successfully! Creator notified to re-submit the fitting."

AC6: Change sample flow

- Click "Change sample" → confirm dialog title "Change the sample?"
- Body: "You'll add a new tracking number to ship a replacement sample. The creator will confirm delivery and submit the fitting again."
- Confirm →
 - status FITTING_SUBMITTED → FITTING_REJECTED
 - Toast "Request Sample change successfully. Add a new tracking number to ship the replacement."
 - UI show Add tracking number section

- When user Add new tracking number, status FITTING_REJECTED
→ 'SAMPLE_SHIPPED'

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs

11. View Sample & Payment details & fitting section in Offer details PHASE 2 READY

- Reviewer can view Sample & Payment details same as in Creator view from status 'Sample_requested' onward
- Reviewer can view fitting section from status '<Sample_requested' onward

12. Creator Management PHASE 2 READY

✓ Click here to expand...

User story: As a Reviewer, I want to manage the creator pool — vet new creators, view profile + portfolio, mark qualified/unqualified

Acceptance Criteria:

AC1: Access

- Sidebar item "Creator Management" → open Creator Management screen

AC2: Field specification (Filters)

Field	Description	Data type	Format	Required?	Validation on field
Search	Search creator	string	Text input; placeholder "Search by name, email, or ID..."	No	Search by name, email, or ID
Status	Status	enum	Filter tabs	No	Options: All / Need review /

					Qualified / Unqualified
Type	Type	enum	Single-select dropdown	No	Options: All types / Model / Studio

AC3: Table columns

Column	Description	Data Logic
Name	Avatar + name Email	
Total Offers	Total offers	Number
Completed Offers	Completed offers	Number
Type	KOL / Studio	Badge with type color
Status	Status	CreatorStatusPill (need_review / qualified green / unqualified)
Action	Action	View + Approve creator + Reject creator

AC4: Action buttons (per row)

- **View:** always enabled; click → open CreatorDetail
- **Mark qualified creator** (solid green): only enabled if status === need_review; click → confirmation modal
- **Mark unqualified creator** (outline red): only enabled if status === need_review; click → confirmation modal

AC5: Confirm modal Mark qualified

- Title "Are you sure you want to mark this creator as qualified?"

- Body: "Mark {name} ({id}) as Qualified. You can then assign a testing offer to evaluate them before they go Official."
- Buttons:
 - Cancel: cancel action
 - Approve creator
 - Toast on success: "Mark creator as qualified successfully!"

AC6: Confirm modal Mark unqualified

- Title: "Are you sure you want to mark this creator as unqualified?"
- Body: Mark {name} ({id}) as Unqualified. They won't receive any offers. You can re-qualify them later."
- Buttons:
 - Cancel: cancel action
 - Reject creator
 - Toast on success: "Marked creator as unqualified successfully!"

AC7: Empty state

- No results → "No results. Try adjusting your filters."

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs

CC2: Failed to update creator! Please try again

13. Creator Detail PHASE 2 READY

✓ 13. Creator Detail

User story: As a Reviewer, I want to view a creator's full profile + portfolio

Acceptance Criteria:

AC1: Access

- Click "View" in Creator Management → open CreatorDetail screen
- Breadcrumb top: "← Back to Creator Management"

AC2: Header

- Title "Creator Profile" + description "Review profile and portfolio submitted by this creator."
- Action buttons on the right **only shown when** `creator.status === "need_review"` :
 - Reject: **shown when** `creator.status === "need_review"` or `'creator.status === "qualified"`
 - Approve: **shown when** `creator.status === "need_review"` or `'creator.status === "unqualified"`

AC3: Header card

- Creator avatar
- Name + email
- 3 chips: Type (Model/Studio) + Status pill (need_review / qualified / unqualified) + ID badge
- Stats grid 3-col:
 - Total offers: no.of total offers assigned
 - Completed: no.of offers having status = offer_paid
 - Joined: created date

AC4: Display Basic profile tab, Portfolio tab

- Same as in creator view

AC5: Payment, Shipping Address

- Show all payment method cards & shipping address card with full information

AC7: Approve/Reject confirm modal: refer AC5, 6 in [PRD - CDM portal for reviewers](#) | [12. Creator Management Phase 2 Draft](#)

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs

14. Duplicate script PHASE 2 READY

✓ 14. Duplicate script

1. **User story:** As a Reviewer, I want to duplicate an existing script and apply it to a chosen product, so that I can quickly create a new script from an existing one without rebuilding it from scratch.

2. **Acceptance Criteria**

AC1: Entry point

- "Duplicate" action available per script (Scripts tab → Action column, and/or Script Detail header).
- Available for scripts in any status (DRAFT or PUBLISHED).
Duplicating always produces a **new DRAFT** and never modifies the original.
- Click "Duplicate" → open "Duplicate script" modal.

AC2: Duplicate script modal — field specification

- Header: "Duplicate script" + × close (click → dismiss without creating).

Field	Description	Data type	Format	Required?	Validation on field
Product	Product to apply to the new script	string (productId)	Searchable single-select dropdown ; placeholder "Select product"	Yes	Default = current script's product; Options = list of products (search by product name, label/ ; on Save if empty → inline error "Please

					select a product"
					filter by product line of original script

- **Cancel:** dismiss modal, no copy created.
- **Save:** always enabled; on click → server validates

AC3: Save system behavior (create draft copy)

On Save, system creates a new script with:

1. New script ID = SC + incremental number
2. Script name = %Original name%_Copy
3. status = Draft ; AI gen = false
4. **Product information** (productId, productName, product line, variant catalog, description, USP) = from the **selected product**
5. **Important — Read me first** = copied from the original script
6. **Scene requirements** = copied from the original (title, action, background, detail requirement, fee, references), **with per-scene Product variants = not selected (empty)**
7. **Persona** = copied from the original script
8. createdBy = CURRENT_REVIEWER.id; createdAt , updatedAt = now(); deadline = today + 30 days, script type copied from the original script
9. Navigate to the new Draft Script Detail screen
10. Success toast: "Duplicate script successfully!"
11. Create failed → toast "Failed to duplicate script! Please try again" (modal stays open).
12. **Corner Case**
 - **CC1:** Product search returns no match → dropdown empty state "No product found."
 - **CC3:** Network / system error → show toastbar error message.

15. Assign new creator for a booking script PHASE 2 READY

✓ 15. Assign new creator for a script

1. **User story:** As a Reviewer, I want to assign additional creators to an already-published script, so that more creators can produce footage for it without creating a new script.

2. **Acceptance Criteria**

AC1: Entry point

- Button "Assign" on the Scripts tab (Action column) and in the Script Detail header.
- Visible only when script status === PUBLISHED.
- Click → open "Assign new creator" modal.

AC2: Assign new creator modal — main view

Field	Description	Data type	Format	Logic
Header	Title + script name	text	"Assign new creator" + script name	
Close button	Close modal	button	× icon top right	Click → dismiss without assigning
Creator assignment	Mode toggle	enum	Segmented control: "Auto assign" "Manual assign"	Same as when publish script
Select creators (manual)	Multi-select Required	array	Searchable multi-select with chips; placeholder "Search creators by name or email..."	• Options: qualified creators matching script type (KOL/Studio) - will change to OFFICIAL creator when apply testing new model flow

				• Creators already assigned to this script are shown disabled as "Already assigned". • At least 1 new creator required
Continue button	Proceed to confirm view	button		Disabled if mode === "manual" && selected === 0

AC3: Confirm view (after Continue)

Element	Content
Heading	"Are you sure you want to assign new creators?"
Subhead	"The selected creators will each receive a new offer for this script."
Summary card	Script title Product Scenes (count + total fee) Assignment Same as when publish script
Back button	"← Back" — returns to the main modal view
Confirm button	Primary "✓ Confirm & assign" - fires the assign action

AC4: Assign action — system behavior

For each newly selected creator

- 1. Append the creator to `script.assignees`
- 2. Create a new Offer
- 3. Success toast: "Assign new creator successfully! Assigned to: {names}"

AC5: Script remains PUBLISHED - no status change

3. **Corner Case**

- **CC1:** All selected creators are already assigned → info toast "These creators are already assigned to this script."; no new offers created.
- **CC2:** Search returns no match → empty state "No results. Try adjusting your filters."
- **CC4:** Assign failed → toast "Failed to assign creator! Please try again" (modal stays open).
- **CC5:** Network / system error → show toastbar error message.

16. Create script via SAMX PHASE 2 READY

✓ Create script via SAMX

User story: As a Reviewer, I want to generate a footage script via SAMX from a product, so that I can quickly produce a draft script instead of writing from scratch.

AC1: Entry point

- On the Products tab, each **Active & Published** product row shows a “**SAMX script**” action
- Click → open the **SAMX** modal.

AC2: SAMX modal — field specification

Field	Description	Data type	Format	Required?	Validation on field
Script type	Studio or Model	enum	Segmented / radio	Yes	Options: Studio / Model
Number of scenes	How many scenes to generate	integer	Number input	Yes	Min 1; max 30 Default: 6
Model on set	Number of models appearing on set	integer	Number input 0–10	Conditional	Default 1; disabled when Script type = Model

Scene type - required	Scene types that must be included	enum array	Multi-select	No	Options from scene-type catalog; cannot overlap with Excluded
Scene type - exclude	Scene types to exclude	enum array	Multi-select	No	Cannot overlap with Required
Exploit / Explore	Ratio of proven (exploit) vs experimental (explore) scenes	number	Two values summing to 100%	Yes	Exploit + Explore = 100

AC3: Generate

- “Generate script” button always enabled; on click → validate.
- Invalid → toast “Please complete the form” + inline errors under each invalid field.
- Valid → system creates a new **DRAFT** script seeded by the SAMX parameters (scenes count, type, scene-type constraints, exploit/explore mix) and navigates to the new Script Detail screen. `AI gen = true`.
 - Don’t Get Product variants & Important - Read me first from SAMX API, Product variants is from PCM, Important - Read me first is from Rule Template (as is)
 - Get Product description, USP from SAMX API
 - Get scene requirements from SAMX API
 - Get detailed version (not the condensed version)
 - Scene name = Scene name from SAMX
 - Action description in CDM = Action Description + Shot from SAMX
 - Background = BACKGROUND & OUTFIT & PROP from SAMX
 - Product variant = Product variant from SAMX
 - Don’t get scene price, set scene price = 0

CC1: Generate failed → toast “Failed to generate script! Please try again” (modal stays open).

CC2: Network / system error → show toastbar error message.

17. Pay & Close offer PHASE 2 READY

✓ Pay & Close offer

User story: As a Reviewer, I want to pay the creator and close an offer once review is complete, so the offer reaches its final state.

AC1: Trigger

- ReviewDetail header shows a **“Close”** button when status == `APPROVED` or `REJECTED` (applies to normal and testing offers).

AC2: Confirm modal

- Title “Pay creator & close offer?”; body “Are you sure you want to pay creator and close this offer? Your action cannot be undone.”
- Buttons: “Keep open” (cancel) / “Pay & close” (confirm).
- Confirm → status → `CLOSED` toast “Offer paid & closed.”

AC3: Timeline for closed-from-rejected

- If the offer was `REJECTED` when closed, the review milestone in the timeline shows **“Rejected”** (red ×) instead of “Approved”, and a “● Rejected” badge appears next to the Timeline title.

AC4: Creator can see the ‘closed’ offer in their side

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs.

18. Creator Management - testing offer flow PHASE 2 READY

✓ Creator Management - testing offer flow

User story: As a Reviewer, I want to assign a testing offer to **qualified creators**, so I can move creators through the testing lifecycle toward Official.

AC1: Button visibility by status (CreatorDetail)

Creator status	Mark qualified	Mark unqualified	Assign testing offer

need_review	Shown	Shown	Hidden
qualified	Hidden	Shown	Shown (if 0 testing offers)
official	Hidden	Hidden	Hidden (already promoted)
unqualified	Shown	Hidden	Hidden

AC2: Assign testing offer

- Shown for **qualified** creators with no existing testing offer (only **one** testing offer per creator). Once assigned, the button is hidden and the Detail tab reads “Testing offer”.
- Opens a modal to pick one Testing script + a **Deadline** (default Today + 20 days, editable). No Fee field (fee comes from the testing script).
- On assign → creates a testing offer (`isTesting = true`) at status **NEW** for that creator, skipping the sample & fitting steps; navigates to the “Testing offer” tab; toast on success.

AC4: List filters

- An “In testing” filter (“Any testing status / In testing / Not in testing”) appears next to search, only on the **All** and **Qualified** status tabs.
 - In testing is computed field
 - true: when user is ‘qualified’ & has assigned 1 testing offer
 - false: when user is ‘qualified’ & has not assigned any testing offer
- Status filter tabs include **Official**. The status column shows the pill plus an “In testing” chip when applicable.

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs.

19. Approve testing footage, promote creator to Official PHASE 2 READY

- ✓ Approve testing footage, promote creator to Official

User story: As a Reviewer, I want approving a testing offer's footage to promote the creator to Official, so qualified creators graduate after passing the test.

AC1: Review

- A testing offer at SUBMITTED / UNDER_REVIEW is reviewed scene-by-scene (same as section 8), but the Sample & Fitting sections are hidden.

AC2: Approve → Official

- On final approve of a testing offer's footage: footage status → APPROVED , **and** the creator's status transitions qualified → OFFICIAL .
- Only OFFICIAL creator will be shown in Assign creator section of every booking script
- After approve/reject of a testing offer's footage, close offer details screen

AC3: Reject

- Reject keeps the creator qualified ; creator can re-upload per the standard footage flow.

3. Corner Case

CC1: Show toastbar error message when network error or system error occurs.

20. Creator Testing section READY

▼ Creator Testing

User story: As a Reviewer, I want a Creator Testing area to manage testing scripts and testing offers, so I can run the new-creator testing program.

AC1: Access

- Sidebar item "Creator testing" with two tabs: **Testing scripts** and **Offers**.

AC2: Testing scripts — list

Scrollable, resizable-column table (same behaviour as Footage Development tables), with View / Edit / Create actions.

Column	Description
ID	Testing script ID
Script name	Testing script name
Product line	Product line
Type	Studio / Model
Scenes	Number of scenes
Fee	Sum of all scene fees
Created by	Creator of the script
Created at	DD-MM-YYYY
Action	View / Edit / Create

AC3: Testing script details (Create / View / Edit)

- Same structure as the footage Script details, **except**: no Product Information section, and no Deadline (deadline is set when assigning).
- Adds a **Product line** selector.
- Add Script Type: single select Model/Studio
- Sections:
 - Important — Read me first
 - Scene Requirements (per-scene title, action, background, detail, fee, references).

AC4: Offers tab

- Scrollable, resizable-column table of testing offers with **search + status filter** (same as Footage Development Offers).
- Testing offer cards reuse the shared offer card; clicking a card opens the corresponding offer details screen.

3. Corner Case

CC1: Show Empty state when no data found.

CC2: Show toastbar error message when network error or system error occurs.

21.

VII. Non-Functional Requirements

Criteria	Expected	Actual	Note
Performance	Page load <2s; image thumbnail load <1s	TBD	CDN + lazy load below fold
File upload	• Max 400 video/script • 3G/video	TBD	Resume support
Offline mode	View offers list- cached; submit actions require online	TBD	Service worker
Security	HTTPS only; PII encrypted; session tokens HttpOnly cookies	TBD	OAuth2 / JWT
Reliability	Uptime 99.9%		
Scalability	adapt to growing KOL, studio, growing footage scripts & deliverables CCU: ??		
Accessibility	Screen reader compatible	TBD	

VIII. Data Migration

IX. Remaining Questions
